2Players 10min Age10+

YOKAI ICHIGOZEROYON

YOKAI1504 is a two-player card duel that condenses the strategy and mind games of trading card games into a distilled and snappy package.

COMPONENTS

- 30 Cards (2 sets of 15)
- 11 Spirit Soul Tokens
- 1 Rulebook
- 2 Health Counters (2 sets of 2)
- 2 Health Trackers

Yokai Cards

a. Name **b.** Effect
c. Attack Power (ATK) **d.** Soul Limit

Front

Back

There are three types of yokai effects:

① Possession
An effect that remains active so long as this yokai has at least one spirit soul token on it.

② Release
This effect is activated by returning one soul from the yokai to the supply.

③ Passive
Effects without an icon remain active while the yokai is on the field.

Spell Cards

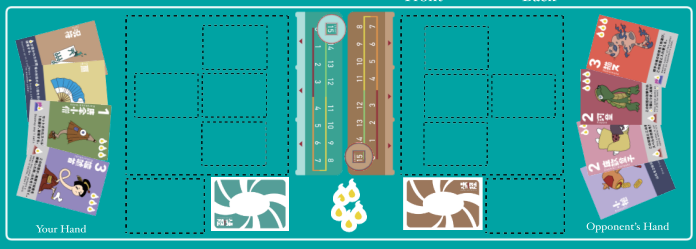

a. Name **b.** Effect

Front

Back

SETUP

① Each player receives a set of two health counters and connects them together. Place the health tracker on the 15 space.

② Place all spirit soul tokens in the center of the table to form the supply.

③ Separate the 30 cards into two identical decks of 15 cards based on the color of the card backs. Each player receives the cards matching their health tracker's color. Both players shuffle their 15 cards and form a face down deck, drawing 4 cards to form their hand. You can never look at your opponent's cards.

④ Play rock-paper-scissors. The winner decides who goes first.

GAME FLOW

Players will play yokai and spell cards to damage their opponent. The first player to reduce their opponent's health to 0 wins the game. Players alternate turns until this happens. Anytime a player takes damage directly, subtract that amount from their current health on the health counter.

A player's turn consists of the following sequential phases:

① Main Phase
② Battle Phase (optional)
③ Turn End
Note: The first player cannot conduct a Battle Phase on their first turn.

① Main Phase

At the start of your Main Phase, draw one card from your deck.
Afterwards, you may perform the following actions in any order and any number of times.
Important: Actions marked with a ☆ can only be performed a combined total of two times per main phase.

A. Play a Card ☆	B. Evoke a Soul ☆
C. Use a Release Effect	D. Set a Spell Trap

A. Play a Card ☆

Select one card from your hand, or the previously set spell trap, and place it face up onto the field.

Yokai:
Yokai remain on your field unless defeated by battle or destroyed by an effect - they will then enter the graveyard. You can have a maximum of 3 yokai on your field at once.

Spells:
Immediately activate the effect of the spell, then place it in your graveyard.

B. Evoke a Soul ☆
Take a spirit soul token from the supply and place it on a yokai in your field.
Each soul token increases the attack power (ATK) of the associated yokai by 1.
You cannot place soul tokens on a yokai that would exceed their soul limit.

C. Use a Release Effect
Activate a "Release Effect" from a yokai on your field by removing a soul token.

D. Set a Spell Trap
Select one spell card from your hand and place it face down on your field.
- Spell traps can trigger on your opponent's turn (explained later).
- You may only have 1 spell trap set on your field at a time.

Once there are no more actions you wish to perform, proceed to the next phase.

② **Battle Phase (optional)**
Select one of your yokai and declare an attack if you wish. You can only attack with one yokai, once per turn.

The battle phase proceeds in the following steps:
I. Select Attacker
II. Select Target
III. Attack Declaration (Spell Trap trigger)
IV. Damage Calculation

I. Select Attacker
Choose one yokai from your field that you wish to attack with.

II. Select Target
If there are yokai on the opponent's field, you must select one of them as the target. Otherwise, you can attack the opponent directly.

III. Attack Declaration
The attacking player declares the attack with their chosen attacker and target. At this time the player being attacked can reveal their set spell trap (if they have one), activating its effects. Once resolved, the spell is placed in the owner's graveyard.

IV. Damage Calculation
・When attacking an opponent's yokai:
The two yokai engage in a battle. Compare the attack power (including any spirit souls) of both cards. The yokai with the lower attack power is defeated and sent to the owner's graveyard. The player whose yokai was defeated takes damage equal to the difference between the two attack power values. If the attack powers are tied, both yokai are defeated and get sent to their respective graveyards, with neither player taking damage.

・When attacking the opponent directly:
The opponent takes damage equal to the total attack power (including any spirit souls) of the attacking yokai.

③ **Turn End**
Once the battle phase is over, switch turns to the next player.

WHEN THE DECK RUNS OUT

If you cannot draw a card due to your deck being empty, deal 1 damage to your opponent per card you were unable to draw.

GAME END

The game ends when any of the following conditions are met:

A player's health reaches 0:
The player with health still remaining wins.

Stalemate:
If neither player can deal damage or draw cards anymore, the player with the higher health total wins. If health is equal, the game ends in a tie.

RULE CLARIFICATIONS

・When a yokai enters the graveyard, all souls on it are returned to the supply.
・If you have 3 yokai on your field, you cannot play any additional yokai.
・If you have a spell trap set on your field, you cannot replace it or set a new spell trap until the current one is triggered or played.
・ If an attacking yokai is destroyed by a spell effect, you cannot perform another attack on the same battle phase.
・When a card refers to "the field" or "the graveyard", it applies to both yours and your opponent's.
・If you attack the player directly, and they summon a yokai via an effect, the attack's target shifts to the newly summoned yokai.
